PART A - Cloud Storage & Architecture

Home > Resource Manager | Resource groups

Create a resource group ...

Basics Tags Review + create

Resource group - A container that holds related resources for an Azure solution. The resource group can include all the resources for the solution, or only those resources that you want to manage as a group. You decide how you want to allocate resources to resource groups based on what makes the most sense for your organization. Learn more

Subscription * (Disabled) Azure subscription 1

Resource group name * smartgear-rg

Region * (Asia Pacific) Central India

Create a storage account ...

Azure Storage is a Microsoft-managed service providing cloud storage that is highly available, secure, durable, scalable, and redundant. Azure Storage includes Azure Blobs (objects), Azure Data Lake Storage Gen2, Azure Files, Azure Queues, and Azure Tables. The cost of your storage account depends on the usage and the options you choose below.
Learn more about Azure storage accounts

Project details

Select the subscription in which to create the new storage account. Choose a new or existing resource group to organize and manage your storage account together with other resources.

Subscription *: Azure subscription 1

Resource group *: smartgear-rg
Create new

Instance details

Storage account name *: smartgearadlshk2026

Region *: (Asia Pacific) Central India
Deploy to an Azure Extended Zone

Preferred storage type: Choose preferred storage type

This helps us provide relevant guidance. It doesn't restrict your storage to this resource type. Learn more

Performance *:
- (●) **Standard:** Recommended for most scenarios (general-purpose v2 account)
- ( ) **Premium:** Recommended for scenarios that require low latency.

Redundancy *: Geo-redundant storage (GRS)

- [x] Make read access to data available in the event of regional unavailability.
- [ ] Geo priority replication guarantees Blob storage data is geo-replicated within 15 minutes.

Create Synapse workspace

Create a Synapse workspace to develop an enterprise analytics solution in just a few clicks.

Project details

Select the subscription to manage deployed resources and costs. Use resource groups like folders to organize and manage all of your resources.

Subscription * — Azure subscription 1

Resource group * — smartgear-rg
Create new

Managed resource group — Enter managed resource group name

Workspace details

Name your workspace, select a location, and choose a primary Data Lake Storage Gen2 file system to serve as the default location for logs and job output.

Workspace name * — smartgear-synapsehk

Region * — (Asia Pacific) Central India

Select Data Lake Storage Gen2 * — From subscription / Manually via URL

Account name * — hkdemo
Create new

File system name * — demosynapse
Create new

We will automatically grant the workspace identity data access to the specified Data Lake Storage Gen2 account, using the Storage Blob Data Contributor role. To enable other users to use this storage account after you create your workspace, perform these tasks:

- Assign other users to the **Contributor** role on workspace
- Assign other users the appropriate Synapse RBAC roles using Synapse Studio
- Assign yourself and other users to the **Storage Blob Data Contributor** role on the storage account

Learn more

Review + create | < Previous | Next: Security >

Create Synapse workspace

* Basics * Security Networking Tags Review + create

Configure security options for your workspace.

Authentication

Choose the authentication method for access to workspace resources such as SQL pools. The authentication method can be changed later on. Learn more

Authentication method
- (●) Use both local and Microsoft Entra ID authentication
- ( ) Use only Microsoft Entra ID authentication

SQL Server admin login * : sqladminuser

SQL Password : ••••••••••••••••

Confirm password : ••••••••••••••••

System assigned managed identity permission

Select to grant the workspace network access to the Data Lake Storage Gen2 account using the workspace system identity. Learn more

[ ] Allow network access to Data Lake Storage Gen2 account.

The selected Data Lake Storage Gen2 account does not restrict network access using any network access rules, or you selected a storage account manually via URL under Basics tab. Learn more

Workspace encryption

Double encryption configuration cannot be changed after opting into using a customer-managed key at the time of workspace creation.

Choose to encrypt all data at rest in the workspace with a key managed by you (customer-managed key). This will provide double encryption with encryption at the infrastructure layer that uses platform-managed keys. Learn more

Double encryption using a customer-managed key
- ( ) Enable
- (●) Disable

```sql
-- Run this block first to create a working database
CREATE DATABASE SmartGearDB;

-- Then switch to it for all subsequent commands
USE SmartGearDB;

-- This tells Synapse to use Managed Identity to access ADLS
CREATE CREDENTIAL [smartgear_managed_identity]
WITH IDENTITY = 'Managed Identity';

-- This points Synapse at your Gold container
CREATE EXTERNAL DATA SOURCE [smartgear_gold]
WITH (
    LOCATION   = 'abfss://gold@smartgearadls.dfs.core.windows.net',
    CREDENTIAL = [smartgear_managed_identity]
);

CREATE EXTERNAL TABLE dbo.ext_region_kpi (
    Region         NVARCHAR(50),
    TotalRevenue   FLOAT,
    TotalOrders    BIGINT,
    TotalUnitsSold BIGINT,
    AvgOrderValue  FLOAT,
    MaxOrderValue  FLOAT,
    MinOrderValue  FLOAT
)
WITH (
    LOCATION     = 'region_kpi/**',
    DATA_SOURCE  = smartgear_gold,
    FILE_FORMAT  = SynapseParquetFormat
);

-- Quick test
SELECT * FROM dbo.ext_region_kpi
CREATE EXTERNAL TABLE dbo.ext_top5_products (
    Product        NVARCHAR(100),
    TotalRevenue   FLOAT,
    TotalUnitsSold BIGINT,
    TotalOrders    BIGINT,
    AvgUnitPrice   FLOAT,
    Rank           BIGINT
)
```
